

Future Leaders

Graduate Programme

Imagine Tomorrow with Te Mātāpuna Fonterra

Technical Stream

Engineering | Food Technology | Science | Environmental Studies

Join our Future Leaders Graduate Programme in our Technical stream and shape the future of dairy.

Step into our **Technical stream**, where curious minds grow into future technical leaders. Through your Masters of Dairy Science & Technology, hands-on research, and site experience, you'll build the expertise and confidence to make real impact.

At Fonterra, your potential is nurtured, your ideas are valued, and your journey is supported every step of the way. If you're driven by science, innovation, and real-world problem solving, this is where your future begins.

For those passionate about **Engineering, Food Technology, Science or Environmental Studies**, this is your opportunity to build the skills that help create a better tomorrow for our land, our people and our co-operative.

Programme structure

- **Year 1:** Complete your Masters with research projects and site experience across New Zealand
- **Year 2:** Two six-month rotations — one in Operations and one broader business rotation

Who we're looking for

- STEM students with a 4-year honours degree
- Demonstrated leadership experience and B-grade average
- NZ citizen or permanent resident
- Full driver's licence by programme start
- Flexible to work and live across New Zealand

Throughout the programme, we invest in your leadership development, helping you Imagine Tomorrow as one of Fonterra's future leaders. You'll gain the skills, confidence, and experience to make an impact across our co-operative and shape the future of dairy.
